### About the Authors

**Rick Ellis** is the founder and CEO of Cadapult Software Solutions, Inc. At Cadapult Software Solutions, Rick provides training and consulting services to clients around the country helping them to get the most out of their design software investment. He is also an independent consultant and instructor specializing in Autodesk Land Desktop, Autodesk Civil Design, Autodesk Survey, Autodesk Map 3D, Autodesk Civil 3D, Autodesk Raster Design, AutoCAD, and Bentley MX Civil Design software. Mr. Ellis is a member of the Autodesk Developer Network, author of “Digging Into Autodesk Land Desktop 2004”, co-author of “Introducing Autodesk Civil 3D”, a K-TEK Certified Professional (KCP), a select author for CAD Digest, an instructor for the AUGI training program, as well as a Level I and Level II Bentley MX certified instructor.

Prior to founding Cadapult Software Solutions Rick worked as a CAD Manager and Civil Designer and then as the Technical Services Manager for an Autodesk Reseller. He brings this real world experience and industry knowledge to his training and consulting projects to provide practical examples and solutions to clients.

You can email Rick at: [rick@cadapult-software.com](mailto:rick@cadapult-software.com)

**Michael Carris** is Business Development Manager for K-TEK Solutions, a K-TEK certified professional, an Autodesk authorized consultant, and an Autodesk certified instructor. With more than 15 years experience in civil engineering and surveying, engineering design, and land surveying, he provides consulting, training, and technical support to many public and private engineering and surveying firms across the country. He is known for his expertise in design visualization, GIS, mapping, civil engineering, and land surveying software applications.

You can email Michael at: [mike.carris@k-tek-solutions.com](mailto:mike.carris@k-tek-solutions.com)

**Russell Martin** is an independent consultant who has worked with spatial data and cartographic design tools since 1985, on several different platforms and in many different business and academic settings. He served as Staff Geographer, Network Administrator and CAD Manager at a multi-disciplinary engineering firm. More recently, Russell served as the Director of Planning on an innovative urban transportation project, where he coordinated the development of an integrated computerized billing and reservations system, wrote the documentation, supervised installation in satellite offices and trained personnel in its setup, use and maintenance.

Russell is a member of the Association of American Geographers, the Autodesk Developer Network and several GIS user groups.

You can email Russell at: [russell@cadapult-software.com](mailto:russell@cadapult-software.com)

### **About Cadapult Software Solutions, Inc.**

[www.cadapult-software.com](http://www.cadapult-software.com)

Founded in 2002, Cadapult Software Solutions, Inc. is an independently owned small business located near Portland, Oregon specializing in training, consulting services, and technical support for CAD systems with a focus on the Civil/Survey/GIS industry. Cadapult Software Solutions helps clients maximize the return on their software investment through training classes, consulting services, and support. We offer a wide range of Training options, from standard open enrollment classes to customized on-site training. Our mobile training lab gives us the flexibility to bring classes to our clients regardless of the location. Support options ranging from telephone support to on-site visits help to ensure the continued success of your CAD solution. Although we hold several certifications with both Autodesk and Bentley, Cadapult Software Solutions is an independent company and therefore can provide recommendations and solutions that best fit a clients needs rather than being limited to a specific company's product line. Further affiliations with other consultants and software companies give Cadapult Software Solutions a broad range of experience and industry knowledge to draw from that is not common for a company of its size.

## Acknowledgements

### Rick Ellis

I would like to thank all the people who made this book possible. There is no way that I can adequately explain the importance of their involvement. But I can simply state that this project could not have been completed without any of them.

Special thanks to my co-authors Michael Carris and Russell Martin for their countless hours of work and dedication. Their input and collaboration was invaluable and I know made this book far better than any of us could have on our own.

Thank you to Brandt Melick and the City of Springfield, Oregon for providing the project data.

And most of all, thank you to my wife Katie, and our children Courteney, Lucas, and Thomas for their love and support. You are the inspiration that made this book possible.

### Michael Carris

I'd like to thank my wife Kris and my children Jack and Reagan for their patience and support during this project.

### Russell Martin

I'd like to thank my father Arthur Martin, whose many travels, joy of learning and insatiable curiosity about the world naturally led me to the field of geography.

## Table of Contents

<b>Chapter 1</b>	<b>Introduction .....</b>	<b>1</b>
1.1	Overview.....	2
1.2	Project Overview.....	2
1.3	Included Data .....	3
1.4	Style Conventions .....	4
1.5	Description of Autodesk Map 3D .....	4
1.5.1	Program Interface .....	4
<b>Chapter 2</b>	<b>Drawing Cleanup.....</b>	<b>7</b>
2.1	Overview.....	8
2.1.1	Concepts .....	8
2.1.2	Terms.....	9
2.2	The Drawing Cleanup Wizard.....	10
2.2.1	Break Crossing Objects .....	10
2.2.2	Extend Undershoots.....	17
2.2.3	Delete Duplicates.....	19
2.2.4	Erase Zero Length Objects.....	21
2.2.5	Erase Dangling Objects .....	23
2.2.6	Apparent Intersections .....	25
2.2.7	Dissolve Pseudo Nodes.....	27
2.3	Boundary Trim .....	30
2.4	Summary.....	32
<b>Chapter 3</b>	<b>Object Data .....</b>	<b>33</b>
3.1	Overview.....	34
3.1.1	Concepts .....	35
3.1.2	Terms.....	35
3.2	Object Data Tables .....	36
3.2.1	Creating Object Data Tables .....	36
3.2.2	Attaching Object Data to Objects .....	43
3.2.3	Attaching Object Data While Digitizing. ....	47
3.2.4	Generate Links.....	52
3.3	Additional Exercises .....	55
3.4	Summary.....	55
<b>Chapter 4</b>	<b>External Data.....</b>	<b>57</b>
4.1	Overview.....	58
4.1.1	Concepts .....	58
4.1.2	Terms.....	58
4.2	External Database Tables.....	60
4.2.1	Attaching External Databases .....	60
4.3	Working With the Data Viewer .....	61

4.3.1	Navigating in the Data Viewer.....	61
4.3.2	Applying SQL Filters.....	64
4.4	Link Templates .....	70
4.4.1	Defining a Link Template.....	70
4.5	Attaching Database Records to AutoCAD Objects.....	72
4.5.1	Attaching Database Data to Existing Objects .....	73
4.5.2	Attaching Database Data While Digitizing .....	74
4.5.3	Generating Links to Existing Blocks.....	78
4.5.4	Highlighting objects by selecting records .....	80
4.5.5	Highlighting table records by selecting objects .....	82
4.5.6	Using Spatial Filters .....	84
4.6	Additional Exercises .....	85
4.7	Summary.....	85
<b>Chapter 5</b>	<b>Annotation .....</b>	<b>87</b>
5.1	Overview.....	88
5.1.1	Concepts .....	88
5.1.2	Terms.....	88
5.2	Annotation Templates .....	90
5.2.1	Defining an Annotation Template.....	90
5.2.2	Annotating Objects.....	94
5.2.3	Annotating Multiple Values .....	95
5.2.4	Updating Annotation .....	101
5.3	Formatting Annotation .....	102
5.3.1	Rotating Annotation to Match an Object .....	102
5.3.2	Adding Text to an Expression.....	105
5.3.3	Using the Inch Symbol (“) .....	107
5.3.4	Adding Length to the Annotation Template.....	109
5.3.5	Controlling Precision .....	113
5.4	Additional Exercises .....	116
5.5	Summary.....	116
<b>Chapter 6</b>	<b>Feature Classes .....</b>	<b>117</b>
6.1	Overview.....	118
6.1.1	Concepts .....	118
6.1.2	Terms.....	118
6.2	Working with Definition Files.....	119
6.2.1	Log in as SuperUser .....	119
6.2.2	Create a New Definition File .....	120
6.2.3	Define a Feature Class.....	122
6.3	Working with Features.....	132
6.3.1	Creating New Features .....	132
6.3.2	Classifying Existing Objects .....	134
6.3.3	Selecting Objects by Feature Class.....	135

6.3.4	Removing the Classification from an Object .....	137
6.4	Nested Feature Classes.....	138
6.4.1	Define a Feature Class Based on another Class.....	138
6.4.2	Classifying Existing Objects in a Nested Class .....	141
6.4.3	Selecting Objects in a Nested Feature Class .....	143
6.5	Additional Exercises .....	145
6.6	Summary.....	145
<b>Chapter 7</b>	<b>COGO.....</b>	<b>147</b>
7.1	Overview.....	148
7.1.1	Concepts .....	148
7.1.2	Terms.....	149
7.2	Input Commands.....	150
7.2.1	The Input and Inquiry Commands Toolbar.....	150
7.2.2	Drawing with Transparent Commands .....	152
7.3	Inquiry Commands .....	156
7.3.1	Line and Arc Information.....	156
7.3.2	Angle Information .....	157
7.3.3	Continuous Distance .....	158
7.3.4	Continuous Distance from a Base Point.....	159
7.3.5	Add Distances .....	160
7.3.6	List Slope .....	160
7.4	Summary.....	161
<b>Chapter 8</b>	<b>Coordinate Tracking .....</b>	<b>163</b>
8.1	Overview.....	164
8.1.1	Concepts .....	164
8.1.2	Terms.....	164
8.2	Coordinate Tracking and Digitizing.....	165
8.2.1	Assigning a Coordinate System .....	165
8.2.2	Coordinate Tracking .....	167
8.2.3	Digitizing Points .....	169
8.3	Summary.....	171
<b>Chapter 9</b>	<b>Importing Data .....</b>	<b>171</b>
9.1	Overview.....	172
9.1.1	Concepts .....	172
9.1.2	Terms.....	173
9.2	Importing Lines .....	174
9.2.1	Importing an ArcInfo Coverage .....	174
9.3	Importing Polygons.....	182
9.3.1	Importing an ArcView Shapefile.....	182
9.3.2	Creating Centroids .....	193
9.3.3	Drawing Cleanup.....	196
9.4	Summary.....	198

<b>Chapter 10</b>	<b>Raster Images.....</b>	<b>199</b>
10.1	Overview.....	200
10.1.1	Concepts .....	200
10.1.2	Terms.....	200
10.1.3	Supported Image Formats: .....	201
10.2	Inserting Images .....	202
10.2.1	Inserting Images without Correlation Data .....	202
10.2.2	Inserting and Correlating an Image. ....	206
10.3	Managing Images .....	209
10.3.1	Hiding and Displaying the Image .....	209
10.3.2	Adjust Image Display Properties .....	210
10.4	Clipping the Image .....	211
10.5	Summary.....	213
<b>Chapter 11</b>	<b>Queries .....</b>	<b>215</b>
11.1	Overview.....	216
11.1.1	Concepts .....	216
11.1.2	Terms.....	216
11.2	Working with Source Drawings .....	218
11.2.1	Attaching Source Drawings.....	218
11.2.2	Viewing Attached Source Drawings .....	222
11.3	Performing Location Queries .....	224
11.3.1	Query by Location All .....	224
11.3.2	Query Objects Inside a Circle.....	229
11.3.3	Deactivating Drawings .....	233
11.4	Performing Property Queries .....	234
11.4.1	Query by Layer .....	234
11.4.2	Query by Length .....	237
11.5	Performing Data Queries .....	238
11.5.1	Query by Pipe Size .....	238
11.6	Performing SQL Queries .....	240
11.6.1	Query by Land Value .....	240
11.7	Performing Compound Queries.....	242
11.7.1	Query by Area and Layer .....	242
11.7.2	Query by Area and Data .....	248
11.7.3	Query by Area and Data, or Layer .....	251
11.8	Saving Queries .....	253
11.8.1	Saving a Query in the Drawing.....	253
11.8.2	Saving a Query to an External File.....	256
11.9	Performing a Report Query .....	257
11.9.1	Writing Query Results to a File.....	257
11.10	Summary.....	264

<b>Chapter 12</b>	<b>Save Backs</b> .....	<b>265</b>
12.1	Overview.....	266
12.1.1	Concepts .....	266
12.1.2	Terms.....	266
12.2	Saving Back to a Single Source Drawing .....	268
12.2.1	Saving Back Queried Objects .....	268
12.2.2	Saving Back Newly Created Objects .....	275
12.2.3	Erasing Queried Objects.....	278
12.3	Saving Back To Multiple Source Drawings .....	280
12.3.1	Saving Back Queried Objects .....	280
12.3.2	Saving Back Newly Created Objects .....	286
12.4	Managing the Save Set.....	289
12.4.1	Finding What Objects are in the Save Set .....	289
12.4.2	Finding Who has an Object in a Save Set .....	290
12.4.3	Removing Objects from the Save Set .....	291
12.5	Summary.....	293
<b>Chapter 13</b>	<b>Coordinate Conversions</b> .....	<b>293</b>
13.1	Overview.....	294
13.1.1	Concepts .....	294
13.1.2	Terms.....	294
13.2	Coordinate Conversions .....	295
13.3	Converting Drawing Objects with a Query .....	295
13.3.1	Assigning a Coordinate System to the Current Drawing 295	
13.3.2	Attaching Source Drawings.....	297
13.3.3	Assigning a Coordinate System to a Source Drawing..	299
13.3.4	Querying and Converting Objects.....	302
13.4	Summary.....	304
<b>Chapter 14</b>	<b>Points</b> .....	<b>305</b>
14.1	Overview.....	306
14.1.1	Concepts .....	306
14.1.2	Terms.....	306
14.2	Creating Points .....	307
14.2.1	Importing Points .....	307
14.2.2	Controlling Point Display .....	309
14.3	Managing Points .....	311
14.3.1	Editing Points .....	311
14.3.2	Creating Point Groups .....	313
14.4	Additional Exercises .....	316
14.5	Summary.....	316

<b>Chapter 15</b>	<b>Surfaces .....</b>	<b>317</b>
15.1	Overview.....	318
15.1.1	Concepts .....	318
15.1.2	Terms.....	318
15.2	Creating a Surface .....	319
15.2.1	Creating a Point Group .....	319
15.2.2	Creating a New Surface.....	323
15.2.3	Controlling Surface Display .....	326
15.2.4	Adding Breaklines.....	327
15.2.5	Using the Object Viewer .....	328
15.3	Editing a Surface .....	329
15.3.1	Editing Source Data .....	329
15.3.2	Editing the Surface Properties .....	330
15.3.3	Changing the Surface Style .....	332
15.4	Additional Exercises .....	332
15.5	Summary.....	332
<b>Chapter 16</b>	<b>Topologies.....</b>	<b>333</b>
16.1	Overview.....	334
16.1.1	Concepts .....	334
16.1.2	Terms.....	335
16.2	Network Topologies .....	336
16.2.1	Creating a Network Topology.....	336
16.2.2	Network Analysis .....	341
16.3	Polygon Topologies.....	344
16.3.1	Creating a Polygon Topology .....	344
16.3.2	Editing a Polygon Topology .....	352
16.3.3	Buffer Analysis .....	354
16.3.4	Overlay Analysis .....	359
16.3.5	Topology Statistics .....	364
16.4	Additional Exercises .....	364
16.5	Summary.....	365
<b>Chapter 17</b>	<b>Thematic Mapping.....</b>	<b>367</b>
17.1	Overview.....	368
17.1.1	Concepts .....	368
17.1.2	Terms.....	369
17.2	Creating Thematic Maps.....	370
17.2.1	Thematic Mapping of Linear Objects with Object Data 370	
17.2.2	Creating a Second Display Map .....	377
17.2.3	Creating a Legend .....	381
17.2.4	Thematic Mapping of Polygons Using External Data ..	382
17.3	Additional Exercises .....	387

17.4	Summary.....	387
<b>Chapter 18</b>	<b>Plotting Map Sets .....</b>	<b>389</b>
18.1	Overview.....	390
18.1.1	Concepts.....	390
18.1.2	Terms.....	391
18.2	Collecting the Components of a Map Set.....	392
18.2.1	Setup a Grid Drawing .....	392
18.2.2	Setup a Title Block .....	393
18.2.3	Configure a Plotter.....	395
18.2.4	Configure a Layout .....	397
18.2.5	Save a Query .....	400
18.3	Creating a Map Set.....	402
18.3.1	Configure the Map Set.....	402
18.4	Summary.....	411
<b>Chapter 19</b>	<b>Exporting Data .....</b>	<b>413</b>
19.1	Overview.....	414
19.1.1	Concepts.....	414
19.1.2	Terms.....	414
19.2	Exporting an ArcView ShapeFile .....	416
19.2.1	Export Objects with Data .....	416
19.2.2	Export Polygon Topology .....	421
19.3	Creating a DWF File with Data .....	425
19.3.1	Export A DWF with Object Data.....	425
19.4	Summary.....	427
<b>Appendix A</b>	<b>Coordinate Systems .....</b>	<b>429</b>
<b>Appendix B</b>	<b>Products that Include Autodesk Map .....</b>	<b>431</b>
